

LIEVEN DIRCKX PHOTOGRAPHER

About

Lieven Dirckx tells stories in rich detail, generous in their sensibility and suffused with a tangible level of finesse. His work consists of meticulously layered scenes starring overlaying moods, combined with games of light and shadow featuring pure elegance and femininity. His photographs are classy, sometimes even classic - yet they always contain a certain twist to please the eye. All of this is the result of years of experience and setting the bar high in terms of stylized composition and lighting, as well as retouching and post-production. In the game since 1999, Lieven has complemented his studies at both Ghent (Belgium) and Reading (UK) universities by developing an excellent sense for his clients' needs. Lieven is a team player who has made his way from editorial work to creative agencies and advertising, going the extra mile to capture fashion the way it should be captured.

“If you’re looking for a photographer who talks commercial yet walks the fine line between advertising and art, Lieven Dirckx is your man. Light is his medium. This results in a highly stylised approach, in which he is always looking for a sharp edge to blend with the beautiful, keeping the eye entertained at all times. These graphic, bold images emanate instant star quality, which have earned Lieven the nickname ‘the Belgian Irving Penn’. To him, photography is about embracing the moment and making it live on forever.”
